Bonds were essentially flat in the overnight session with a very narrow range in both Asia and Europe. There was no major reaction to the earlier employment reports (Challenger at 730am and ADP at 815am), but a modest rally after another elevated reading in Jobless Claims (8:30am).

10yr yields are down 2.6bps at 4.406 and MBS are up 1 tick (.03).

The day's biggest potential market mover remains the 10am release of ISM Services data.
