Super Duper Flat After Overnight Losses

MBS Recap Matthew Graham | 5:21 PM

In a vacuum limited to this week, Friday ended up being the only interesting day because it was the only outlier in terms of bond market price action. On the previous 4 days, the highest MBS price was within a 0.09 range and the lowest price was within a 0.06 range. Lastly, the widest high/low range of the week was about a guarter point. If you're not sure what to make of that, it means Mon-Thu were flat. Friday was flat too, but only after overnight losses took MBS prices almost a half point below Thursday's highs. In the bigger picture, this still isn't that significant--especially considering these levels would still be the best in several months before last Thursday's friendly CPI data.

MBS Morning

10:26 AM Lower Volume And Corporate Bond Issuance Pushing Yields Higher

Market Movement Recap

10:03 AM	Weaker overnight with additional selling early.	10yr up 4.2bps at 4.242.	MBS down 6 ticks (.19)
	Weaker Overingin with additional selling early.	10y1 up 4.2bps at 4.242.	IVIDO GOWII O GCKS (.19)

01:04 PM	sideways near weakest levels.	MBS down 5 ticks ((.16) and 10yr	up 3.4bps at 4.236

03:45 PM	Zero change since last update.	Very flat in general since the AM hours and even flatter in the
	PM hours.	

Lock / Float Considerations

Bonds continue struggling to find a reason to extend the recent rally in any major way, but they're also not struggling at all to find reasons to hold ground at the strongest levels in months. It's too soon to conclude that Friday's weakness marks a trend reversal, but again, we're not sure what the rationale would be for a major extension of the gains until and unless CPI or NFP make a rate-friendly case (and those reports are still weeks away).

Technicals/Trends in 10yr (why 10yr)
