A message from Nickolas Inhelder:

## We Make Home Happen.™

Our goal is simple:

To help every family we serve get to “Yes.”

Yes to the loan that unlocks the joy of home ownership.

Yes to the lending solution that meets every client’s unique needs and wants.

That’s why we dedicate our every resource to serve as your personal guide through the lending process, solving problems, building confidence. Aslan has access to every lending option leading to the purchase or refinance of a residential home loan.

This is more than work for us. It is our unique joy in this life to share our collective skill, creativity, and care to bring you and your family right to where you belong.

Let’s make home happen.

## The Day Ahead: Stronger Data Saps Overnight Gains

At the risk of tempting fate by discussing a leveling-off of the post-Fed correction again, the overnight session saw the most compelling case yet for the correction having run its course.

The evidence didn't have as much to do with the outright level of gains in longer term yields as it did with the shape of yield curve trading over the past 2 days. During that time, the curve hit a ceiling and held flat for the longest period of time post-Fed-meeting.

The improvement in yields was a bonus, but it was quickly counteracted by a stronger round of 8:30am econ data.

Last but not least, it's important not to assume that the yield curve movement will mean one specific thing for longer term rates going forward. The curve can widen/rise even as rates are coming down--something that it has done quite a bit over the past few months. Either way, the evolution of the following chart would look least surprising if it continues to widen.
