# Year-End Trading. No Big Deal

MBS Recap Matthew Graham | 2:19 PM

Bonds started stronger but lost ground quickly and inexplicably starting around 10:30am ET. This was a classic example of year-end trading causing random volatility. It had nothing to do with news, data, or any other typical motivations. Bonds are now closed for the day/month/year and will be back in action on Thursday. Happy New Year!

### Lock / Float Considerations

Rates continue muddling along at or near longer-term highs following the December 18th Fed announcement. There haven't been any glorious recoveries since then. If we hope to see one, it would depend on big ticket econ data like the jobs report or CPI (Jan 10th and 15th respectively). Random volatility remains a risk in the New Year holiday week. If we see calendar-driven support, it wouldn't be until Thursday and even then (and to reiterate), bigger victories require bigger data.
