Orderly Move to Highest Yields in 8 Months

MBS Recap Matthew Graham | 4:20 PM

Bonds reacted logically to this morning's econ data at 10am. ISM Services' inflation component was one of the worst offenders, but higher job openings didn't help. The spike in yields was instantaneous but fairly well contained. Bonds managed to drift sideways for the entire session after that with no discernible reaction to the 10yr Treasury auction (not a surprise considering it was very close to expected levels). All told, yields inched up to the highest since April 2024, but in a very orderly way.

Lock / Float Considerations

Rates continue muddling along at or near longer-term highs following the December 18th Fed announcement. There haven't been any glorious recoveries since then. If we hope to see one, it would depend on big ticket econ data like the jobs report or CPI (Jan 10th and 15th respectively).
