Mortgage and Real Estate News That Matters

A message from Nickolas Inhelder:

## We Make Home Happen.™

Our goal is simple:

To help every family we serve get to “Yes.”

**Yes** to the loan that unlocks the joy of home ownership.

**Yes** to the lending solution that meets every client’s unique needs and wants.

That’s why we dedicate our every resource to serve as your personal guide through the lending process, solving problems, building confidence. Aslan has access to every lending option leading to the purchase or refinance of a residential home loan.

This is more than work for us. It is our unique joy in this life to share our collective skill, creativity, and care to bring you and your family right to where you belong.

**Let’s make home happen.**

## Mortgage Applications Don't Have Much to Lose

2024 has been one of those "it is what it is" sort of years for activity in the mortgage market.

There were signs of hope over the summer months as rates fell enough to make for a

noticeable spike in refinance activity. But with the rapid reversal starting in October, refi demand is right back in line with long term lows according to the Mortgage Bankers Association's (MBA) refinancing index.

It's hard to see in the chart, but this week's survey actually showed a modest increase over last week, the difference is inconsequential as both are effectively the lowest levels since late 2023.

The purchase side of the market has been less eventful, but no less depressing.

This application data was collected well before this week's jobs report and subsequent rate spike. As such, we wouldn't expect any resilience in next week's numbers. On the brighter side, present levels are so repressed that we also wouldn't expect much more of a contraction.
