

# MORTGAGE RATE WATCH

Daily Coverage. Industry Leading Perspective.

A message from Nickolas Inhelder:

## We Make Home Happen.™

Our goal is simple:

To help every family we serve get to “Yes.”

**Yes** to the loan that unlocks the joy of home ownership.

**Yes** to the lending solution that meets every client’s unique needs and wants.

That’s why we dedicate our every resource to serve as your personal guide through the lending process, solving problems, building confidence. Aslan has access to every lending option leading to the purchase or refinance of a residential home loan.

This is more than work for us. It is our unique joy in this life to share our collective skill, creativity, and care to bring you and your family right to where you belong.

**Let’s make home happen.**

## Rates Move Back Toward Lows After Fed Announcement

Heading into today, we knew the afternoon's Fed announcement was biggest potential flashpoint for interest rate movement, and that the movement probably wouldn't be extreme. The unknown, as always, was the direction of said movement. Thankfully, it was lower.

This wasn't destined to be the case this morning. Out of the gate, the average mortgage lender was offering slightly higher rates compared to yesterday's latest levels. After markets reacted to the Fed, lenders revised their rates to the lowest levels in just over a week (also fairly close to the low end of the range going back to mid October).

What did the Fed say/do to bring rates down?

First off, the bond market movement wasn't big, even by the standards of a regular non-Fed day. That said, there was definitely a reaction to the Fed. Some of it had to do with the Fed's rate forecasts staying fairly grounded despite concerns that recent inflation readings could push those forecasts higher.

In addition, the Fed made some changes to the way it handles the payments it receives on bonds it already owns. The changes will allow the Fed to reinvest more of those payments back into buying new bonds, and bond buying is good for rates, all other things being equal.
