A typical beat/miss in monthly CPI consists of a 0.1 deviation from expectations. 0.2 is less common and is a bittersweet victory for bonds in light of inflation that may be yet to come due to tariffs. That's the concept that explains why bonds aren't experiencing a tremendous rally on this news.

Yields were already lower overnight and have added only modestly to those gains following the data. MBS are up 5 ticks (.16) and 10yr yields are down 5.3bps at 4.300.
