## Absence Makes the Bonds Grow Stronger

MBS Recap | Matthew Graham | 4:38 PM

Bonds improved at a moderate pace for the 2nd day in a row, thus marking the first sustained push back against the recent rate spike. The gains are notable because they are not being driven by any big, new developments on the trade/tariff front. Instead, it is the absence of any such developments that is allowing the market to get back into a relatively calmer groove. That said, we wouldn't take the calm for granted. Bonds have merely moved back to more nimble territory as we wait for more policy clarity.

## Lock / Float Considerations

- Markets sent a strong message to the administration regarding the implementation of tariff policies and the administration adjusted. Markets have subsequently adjusted back to the pre-tariff range. Volatility risk remains higher than normal and the farther yields fall into the pre-tariff range (roughly 4.15 - 4.40% in 10yr yield), the more a defensive strategy makes sense.
