## Don't Sweat The Modest Weakness

MBS Recap | Matthew Graham | 4:47 PM

Bonds began the day roughly unchanged and very flat for most of the morning. MBS began falling as we moved into the PM hours, ultimately resulting in a handful of negative reprices, about a quarter point of weakness, and a 4+bp jump in Treasury yields. If the frame of reference is limited to the domestic session, this is a moderate sell-off at best, but in the bigger picture, it was not even worth mentioning, let alone considering as a cause of concern. Bonds are heading into the 3 day weekend at much less alarming levels than last week, and with the the same requirement to wait for clarity on fiscal policies before the next major movement is revealed.

## Lock / Float Considerations

- Markets sent a strong message to the administration regarding the implementation of tariff policies and the potential impact on the economy.

the administration adjusted. Markets have subsequently adjusted back to the pre-tariff range. Volatility risk remains higher than normal and the farther yields fall into the pre-tariff range (roughly 4.15 - 4.40% in 10yr yield), the more a defensive strategy makes sense.
