Don't Sweat The Modest Weakness

MBS Recap | Matthew Graham | 4:47 PM

Bonds began the day roughly unchanged and very flat for most of the morning. MBS began falling as we moved into the PM hours, ultimately resulting in a handful of negative reprices, about a quarter point of weakness, and a 4+bp jump in Treasury yields. If the frame of reference is limited to the domestic session, this is a moderate sell-off at best, but in the bigger picture, it was not even worth mentioning, let alone considering as a cause of concern. Bonds are heading into the 3 day weekend at much less alarming levels than last week, and with the the same requirement to wait for clarity on fiscal policies before the next major movement is revealed.

Lock / Float Considerations

- Markets sent a strong message to the administration regarding the implementation of tariff policies and the administration adjusted. Markets have subsequently adjusted back to the pre-tariff range. Volatility

the administration adjusted. Markets have subsequently adjusted back to the pre-tariff range. Volatility risk remains higher than normal and the farther yields fall into the pre-tariff range (roughly 4.15 - 4.40% in 10yr yield), the more a defensive strategy makes sense.
