## JOLTS Data Didn't Help, But it Didn't Hurt Much Either

MBS Recap | Matthew Graham | 4:43 PM

Bonds were moderately stronger overnight and then weaker after the 10am JOLTS data. The data itself was mixed with Job Openings higher (bad for rates) and job quits lower (good for rates). The headline took precedence and pushed yields back into higher territory on the day. Selling ebbed in the PM hours and MBS ultimately made it back to positive territory. Headlines regarding the Senate taking up the budget bill are ramping up, but with no discernible impact on the bond market so far. Bottom line, a roughly unchanged close in bonds requires very little explanation. On to the next data with ISM Services on Wednesday!

## Lock / Float Considerations

- Rates have managed to find support at recent high yields after spending most of May moving decisively higher. Prevailing momentum is sideways in a fairly narrow range in the bigger picture. It continues to

higher. Prevailing momentum is sideways in a fairly narrow range in the bigger picture. It continues to be the case that a truly worthwhile rate rally will require sharply weaker economic data, a consistent failure of tariff-driven inflation to materialize, and/or a legitimate reason to expect lower Treasury issuance.
