Some Headwinds Ahead of Powell's Jackson Hole Speech

MBS Recap Matthew Graham | 1:25 PM

Thursday brought the week's only relevant econ data with 3 occasional market movers on tap. Their results were mixed, but the important development was that the inflation components of the Philly Fed and S&P PMI data agreed that price pressures are alive and well. This made for a weaker start during the AM hours and that weakness was exacerbated by comments from Fed's Hammack (who said current data doesn't justify a September rate cut). A super strong 30yr TIPS auction at 1pm helped push back just a bit (which is guite remarkable as this essentially never has an impact). In the bigger picture, bonds could still be classified as drifting sideways to slightly weaker in a narrow range. Friday morning's speech from Fed Chair Powell isn't guaranteed to cause volatility, but it's the week's only true top-tier event in terms of volatility potential.

Some resilience after strong 30yr TIPS auction (never have we ever seen a 30yr TIPS auction move the market). 10yr up 3.4bps at 4.329 and MBS down 3 ticks (.09).

Lock / Float Considerations

Modest, incidental, summertime drift in bonds without much on the calendar to cause volatility concerns apart from Friday's Powell appearance at Jackson Hole. There's little to be done with respect to lock/float decisions at times like this. Risk tolerant clients will wait for a bigger move to inform their decisions. Risk averse clients are happy to lock with rates still near long-term lows. And those in between are well served by flipping coins.
