Bonds Turn Green After Econ Data and Treasury Auction

MBS Recap | Matthew Graham | 4:26 PM

Bonds began the day in slightly weaker territory as yields continue to drift inside the narrow post-Fed range. The absence of big-ticket econ data is a key reason for the lack of volatility. But the lower-tier econ data can still move the needle as evidenced by this morning's NY Fed Survey of Consumer Expectations. The survey showed a slight deterioration in attitudes about the labor market. Bonds moved into stronger territory after that and went on to hit the day's best levels shortly after a well-received 3yr Treasury auction.

Lock / Float Considerations

In terms of trends and outright levels, the modest rally to the lowest rates in more than 2 weeks presents a compelling lock opportunity for risk-averse clients.
