Decent Recovery After AM Backtracking

CPI data was a mixed bag for bonds. Top-line numbers fueled a quick rally and digestion of the details brought us back to negative territory (albeit with help from stronger S&P PMI data). Bonds found their footing shortly after 10am at just slightly stronger levels and then stayed mostly sideways through the close. Pretty ho-hum CPI day given all the anticipation...

Lock / Float Considerations

- Rates nudged just a bit higher over the past 2 days, regardless of the apparently friendly inflation data on Friday morning. This builds an ongoing case for current levels representing something of a floor, or at least a temporary hitching post on the path to wherever we're headed next. Next week's auctions and Fed press conference could help inform that path, but not in the same way that big-ticket econ data could.
