## Another Hawkish Powell Press Conference Harshes Bonds' Mellow

**MBS Recap** | Matthew Graham | 3:11 PM

The Fed cut rates and ended QT. Neither were surprises for markets and neither had an impact. The press conference was [hawkish](#), however, with Powell saying a December cut was far from a foregone conclusion. This is very much counter to the market's expectation that a December cut was a lock. Fed Funds Futures tanked and yields surged about 8bps in the 10yr. MBS lost about 3/8ths and negative reprices continue to roll in.

The screenshot displays the MBS LIVE interface. On the left, there are two charts: 'MBS 30 Year' and '10 Year Treasury'. The MBS chart shows yields for various coupon rates, with a significant drop in yields for the 3.5% and 4.0% coupons. The Treasury chart shows yields for 2, 5, 10, and 30 years, with a notable increase in the 10-year yield. In the center, a large video player is overlaid with the text 'PLAY VIDEO'. To the right, there is a 'NEWS' section with a list of recent articles and a 'REPORTS & PRICES' section with a table of current yields for various MBS categories. The bottom of the screen features a 'NEWS ALERT' section with a headline about the ECB's rate decision.

## Lock / Float Considerations

- The negative reaction to the Fed press conference runs some risk of follow-through on Thursday. Risk averse clients are already locked. Risk-tolerant clients may be seeing their sign to lock in today's developments. We won't be comfortable saying that risk/reward is back to a balanced level until we see that this afternoon's negative momentum fails to follow through in the 2nd half of the week.
