## Lowest Yields in Almost 4 Weeks Despite Ongoing Stock Market Recovery

MBS Recap | Matthew Graham | 4:38 PM

There's no question that stock prices and bond yields have had more than the normal amount of correlation recently. While that created some risk of a bond market weakness in the event of a stock market correction, those fears are proving unfounded over the past 2 trading days. Granted, stocks haven't surged, but they did move back to the highest levels in a week on Monday. But bonds didn't follow. In fact, after a microscopically stronger start, yields continued to fall gradually throughout the session, ultimately closing

at the lowest level since the late October Fed meeting.

## Market Movement Recap

- 08:53 AM Modestly stronger overnight and holding gains so far. MBS up 2 ticks (.06) and 10yr down 1.3bps at 4.05
- 12:04 PM MBS up 3 ticks (.09) and 10yr down 1.7bps at 4.047
- 02:52 PM Best levels of the day with MBS up an eighth of a point and 10yr down 2.7bps at 4.037

## Lock / Float Considerations

- Volatility risk increases over the next 2 days due to a combination of a busier economic calendar and the typical Thanksgiving week **illiquidity**. Risk averse clients are happy to be locking rates that are close enough to lows of the past month. The most risk-tolerant clients can afford to wait and see if the range ceiling is challenged. Moderately risk-tolerant clients are cognizant that it will require more timely bigger ticket data in mid-December in order to see a significant improvement in rates.
