Mortgage Rates Erase Last Week's Gains

Mortgage rates are based on bonds and the bond market is prone to erratic behavior on major holiday weeks. One of the more common patterns is for the holiday week to see a noticeable departure from a prevailing trend only to return to that trend in the following week.

That's exactly what we're seeing on the first day of the new week. The prevailing trend saw rates hold a narrow, sideways range with the average top tier 30yr fixed rate in the 6.3s. Last week saw that average drop to 6.20% and now today, we're right back up to 6.31%.
