While the November job count may have been higher, the focus is on the uptick in the unemployment rate. 4.6% is a new cycle high and it validates the Fed's concern over a weaker labor market.

10yr yields are down a quick 2.7bps at 4.149 and MBS are up 6 ticks (.19).

To some extent the uptick in the participation rate lessens the severity of the unemployment uptick (i.e. it's more like a 0.1% miss instead of 0.2%).
