Range-Bound Cruise Control, PM Edition

MBS Recap | Matthew Graham | 3:57 PM

Bonds came into the domestic session at slightly weaker levels and held mostly sideways for the entire day. There were no meaningful market movers in play, let alone any meaningful movement. Volume clocked in at the lowest non-holiday level of the year. NOTE: this week's analysis will be shorter and more basic than normal unless something interesting happens.

Market Movement Recap

- 09:25 AM modestly weaker overnight and holding sideways so far. MBS down 2 ticks (.06) and 10yr up 2bps at 4.16
- 01:52 PM MBS still down 2 ticks (.06) and 10yr up 2.8bps at 4.168
- 03:37 PM MBS down 1 tick (.03) and 10yr up 2.6bps at 4.166

Lock / Float Considerations

- We're now entering peak holiday mode for bond markets. This means a wider range of movement that can happen for no apparent reason even though the average year sees rates drift aimlessly sideways in the 2nd half of December. The next risk for consequential volatility from scheduled events won't be until the first week of January.
