Uneventful And Slightly Stronger

MBS Recap | Matthew Graham | 4:25 PM

Although volumes picked up a bit versus Friday, no one would confuse the late December bond market from exhibiting any unexpected signs of life. A stronger open in Europe made for a modest improvement overnight and almost all of the domestic session was spent treading water at those same levels.

Market Movement Recap

Lock / Float Considerations

- We're now entering peak holiday mode for bond markets. This means a wider range of movement that can happen for no apparent reason even though the average year sees rates drift aimlessly sideways in the 2nd half of December. The next risk for consequential volatility from scheduled events won't be until the first week of January.
