MBS Recap: Modest Incidental Weakness

Modest Incidental Weakness

MBS Recap | Matthew Graham | 3:51 PM

Despite a bit of incidental selling today, the bond market has survived the winter holiday season without even attempting to break outside the narrow prevailing range. This is especially true for shorter duration Treasuries and MBS. It has been and continues to be the case that we won't get a sense of the next wave of momentum until next week at the earliest. It could take even longer if the econ data fails to make a compelling case for better or worse.

Lock / Float Considerations

- We're now entering peak holiday mode for bond markets. This means a wider range of movement that can happen for no apparent reason even though the average year sees rates drift aimlessly sideways in the 2nd half of December. The next risk for consequential volatility from scheduled events won't be until the first week of January.
