Modest Incidental Weakness

MBS Recap | Matthew Graham | 3:51 PM

Despite a bit of incidental selling today, the bond market has survived the winter holiday season without even attempting to break outside the narrow prevailing range. This is especially true for shorter duration Treasuries and MBS. It has been and continues to be the case that we won't get a sense of the next wave of momentum until next week at the earliest. It could take even longer if the econ data fails to make a compelling case for better or worse.

The screenshot shows the MBS Live software interface. On the left, there's a 'TIME PRICING' table for MBS 30 Year bonds, showing yields and prices for various coupon rates. In the center, there's a 'REAL TIME CHART (MAIN)' for the 30 Year Treasury, showing price, open, close, and high/low values. A large play button is overlaid on the chart area. To the right, there's a 'REAL TIME CHART (10Y)' for the 10 Year Treasury, also showing price, open, close, and high/low values. On the far right, there's a 'MBS LIVE CHAT' window with a list of messages from users like Glenn, Andy, and Michael. At the bottom, there are sections for 'GIVE NEWS STARS', 'GIVE A REPORTER A PRIZE', and a 'GIVE A REPUTATION PRICE' poll.

Econ Data / Events

- ○ S&P Global Manufacturing PMI
 - 51.8 vs 51.8 fcst, 52.2 prev

Market Movement Recap

09:35 AM Modestly stronger overnight and little-changed so far. MBS up 2 ticks (.06) and 10yr down 0.3bps at 4.165

01:29 PM weakest levels of the day. MBS down 1 tick (.03) and 10yr up 1.7bps at 4.186

Lock / Float Considerations

- We're now entering peak holiday mode for bond markets. This means a wider range of movement that can happen for no apparent reason even though the average year sees rates drift aimlessly sideways in the 2nd half of December. The next risk for consequential volatility from scheduled events won't be until the first week of January.
