## Ending Near Unchanged Levels After Early Head Fake

MBS Recap | Matthew Graham | 4:24 PM

Trading volumes confirm that bonds are 100% back in action, but after this morning's selling pressure proved to be a head fake, that volume hasn't translated to any meaningful momentum. This isn't too hard to accept considering the absence of big-ticket econ data. Things change on Wednesday with the release of ADP, JOLTS, and ISM. This is our first chance to see some actual data-driven volatility in several weeks.

## Lock / Float Considerations

- The second half of the week brings a long-awaited glut of bigger-ticket data. The first hurdle is Wednesday morning's ADP, JOLTS, and ISM. Taken together, these introduce plenty of risk of a departure from the recent range, for better or worse. Risk-averse clients have an easy decision to make with average rates very close to long term lows.
