## Ultimately Underwhelming Despite Seemingly Significant Data

**MBS Recap** | Matthew Graham | 4:59 PM

There was certainly the potential for volatility today with the confluence of ADP, ISM, and Job Openings data. But the results ended up being close enough to consensus to obviate any massive reactions. Yields hit their lowest levels in a week after ADP came in slightly softer, but most of the rally was already in place from the overnight session. Stronger ISM and job openings pushed bonds back in the other direction, but not enough to result in bond market losses or negative reprices.

## Lock / Float Considerations

- With Wednesday's data failing to inspire any significant volatility, attention turns to Friday's jobs report as this week's last big-ticket event. Thursday is a bit of a push, but with rates at 2-month lows, risk averse clients remain in lock mode.
