CPI Helped Bonds Avoid Losing Ground

MBS Recap | Matthew Graham | 4:46 PM

Bonds began the day in slightly weaker territory and managed to flip into slightly stronger territory after the CPI data. Core monthly CPI printed at 0.2, but was rounded down from 0.24. In other words, it wasn't as big of a beat as the "0.2 vs 0.3" result suggested. The notion of inflation being "lower but still elevated" contributed to the tepid response. As for MBS, they were in positive territory all day even though charts made them look weaker due to monthly settlement. Wednesday morning brings November's retail sales data and Producer Price Index (PPI). Neither are as heavy hitting as CPI, but they could move the needle if they fall far from forecast.

The screenshot shows the MBS LIVE software interface. It includes a 'TIME PRICING' section with a table of bond yields for various maturities (10yr, 20yr, 30yr, 30yr TIPS) and a 'REAL TIME CHART (MAIN)' showing a line graph of bond yields over time. A large circular video player in the center is labeled 'PLAY VIDEO'. To the right is a 'MBS LIVE CHAT' window showing a list of messages from users like 'Victor Davis' and 'Andy Pfeifer'. At the bottom, there's a 'MBS LIVE REPORTS & FORCES' section with a 'Report Summary' table and a 'Report by' section.

Lock / Float Considerations

- Bonds weren't too keen on a big reaction to CPI data, but that shouldn't stand as evidence that data will continue to be ignored. Wednesday's offerings aren't on CPI's level, but there's still room for volatility if they fall far from forecasts. Moreover, Treasuries seem like they're just waiting for an excuse to test a bearish breakout.
