CPI Helped Bonds Avoid Losing Ground

MBS Recap | Matthew Graham | 4:46 PM

Bonds began the day in slightly weaker territory and managed to flip into slightly stronger territory after the CPI data. Core monthly CPI printed at 0.2, but was rounded down from 0.24. In other words, it wasn't as big of a beat as the "0.2 vs 0.3" result suggested. The notion of inflation being "lower but still elevated" contributed to the tepid response. As for MBS, they were in positive territory all day even though charts made them look weaker due to monthly settlement. Wednesday morning brings November's retail sales data and Producer Price Index (PPI). Neither are as heavy hitting as CPI, but they could move the needle if they fall far from forecast.

The image shows the MBS Live software interface. On the left, there's a 'TIME PRICING' table for MBS 30 Year bonds, showing various yields and prices. In the center, there are three stacked 'REAL TIME CHART (MBS)' for 30yr, 10yr, and 10 Year Treasury, each with a play button overlaid. Below the charts is a 'LIVE NEWS STREAM' with a headline about the Fed's stimulus. On the right, there's a 'MBS LIVE CHAT' window with a list of users and their messages. A large 'PLAY VIDEO' button is overlaid across the bottom of the interface.

Lock / Float Considerations

- Bonds weren't too keen on a big reaction to CPI data, but that shouldn't stand as evidence that data will continue to be ignored. Wednesday's offerings aren't on CPI's level, but there's still room for volatility if they fall far from forecasts. Moreover, Treasuries seem like they're just waiting for an excuse to test a bearish breakout.
