Bonds Recovering a Bit After "Framework of a Deal" on Greenland

MBS Recap | Matthew Graham | 3:44 PM

Geopolitics have been front and center for financial markets over the past 2 days with both stocks and bonds taking clear cues from newswires pertaining to tariff brinksmanship, trade deal negotiations, foreign wealth fund participation, and ultimately, the late-day announcement of a "framework of a deal" regarding Greenland. Details are in short supply, but the most important development being a pause on the plan to implement new tariffs on February 1st. Markets are cautiously trading this as a win for now with stocks and bonds at the best levels of the week, but definitely not back in line with last week's levels.

Lock / Float Considerations

Geopolitical risks began to ebb on Wednesday with potential Greenland de-escalation. This helps

- Geopolitical risks began to ebb on Wednesday with potential Greenland de-escalation. This helps - resolve the asymmetry we discussed on Tuesday and possibly creates some favorable asymmetry in the other direction. To reiterate yesterday's important point: asymmetric risk is never intended as a comment on future directional movement, but rather, the relative size of rally potential vs selling potential. On a very short term, tactical note, those floating with lenders who do NOT reprice for the better this afternoon will have a bit of a cushion heading into tomorrow as rate sheets were flat before several lenders began to reprice (and MBS are up roughly 19bps on the day as of 3:30pm).
