## Bonds Erase Most of The Overnight Weakness

MBS Recap | Matthew Graham | 4:05 PM

Thursday could be viewed two ways. On one hand, bonds lost ground early and were unable to recover it by the 3pm close. On the other hand, there was a decent rally on Wednesday that set a high bar for additional gains. In other words, it's a victory to merely hold close to yesterday's closing levels. Data passed without a trace, either because it was stale, near consensus, or both. There was better buying in the afternoon--a fact that's consistent with our observation that the EU session had an impact today. The afternoon bond market recovery commenced when EU markets closed. Correlation, yes, but not necessarily causality.

## Lock / Float Considerations

- Geopolitical risks began to ebb on Wednesday with potential Greenland de-escalation. This helps resolve and rebalance the asymmetric risk we noted on Tuesday. Bonds have been reasonably flat since then and data hasn't been notable. For risk-averse clients, it's worth remaining defensive until we can rule out an aftershock to Tuesday's sell-off. Either way, one of two things is required for a meaningful push back toward lower rates: more selling to set an entry point for buyers, or legitimate deterioration in big ticket data (and there's none on the horizon until the first week of February).
