Uneventful Conclusion to a Volatile Week

MBS Recap | Matthew Graham | 4:45 PM

Bonds put in a decent day on Friday, ultimately getting back into positive territory and the best closing levels of the week. Yields were almost perfectly in line with last Friday's. Overall, most of the past 3 days have been uneventful, but Tuesday's range breakout meant it was a volatile week overall. MBS and mortgage rates enjoyed ample insulation against that breakout thanks to recent outperformance driven by GSE MBS purchases (both actual and anticipated). The Fed is on deck next week, but with a zero percent chance of a rate cut. True big ticket data won't return until the week after next.

Lock / Float Considerations

- Mortgage rates have some insulation against broader bond market sell-offs due to GSE MBS purchases, but barring a big Treasury rally, the lower limit of the mortgage rate range was established in early

January. One of two things is required for a meaningful push back toward lower rates: more selling to set an entry point for bond buyers, or legitimate deterioration in big ticket data (and there's none on the horizon until the first week of February).
