

A message from Nickolas Inholder:

## We Make Home Happen.™

Our goal is simple:

To help every family we serve get to “Yes.”

**Yes** to the loan that unlocks the joy of home ownership.

**Yes** to the lending solution that meets every client’s unique needs and wants.

That’s why we dedicate our every resource to serve as your personal guide through the lending process, solving problems, building confidence. Aslan has access to every lending option leading to the purchase or refinance of a residential home loan.

This is more than work for us. It is our unique joy in this life to share our collective skill, creativity, and care to bring you and your family right to where you belong.

Let’s make home happen.

## The Day Ahead: Why Don't Bonds Care About The Massive Miss in PPI?

PPI... The Producer Price Index. It sounds a lot like CPI because both are published by the Bureau of Labor Statistics and they share lots of methodology and structure. Given that CPI has been responsible for some of the biggest bond market reactions, you'd be well within your rights to expect a big sell-off after seeing something like Core PPI coming in at 0.7 vs a 0.2 forecast and 0.0 previous reading. After all, if that happened in CPI, bond yields could easily be shooting 10bps higher. But PPI is notoriously more volatile. In addition, it's most useful to the bond market due to its implications for consumer inflation. To that end, we can track the categories that flow through to PCE inflation, and those categories didn't paint nearly as inflationary a picture as the headline and core readings.
