Volatility Eludes Bonds

MBS Recap | Matthew Graham | 4:35 PM

Bonds saw some steady selling pressure earlier in the week, but with the total damage amounting to an average of 2bps per day in 10yr yields, it was anything but volatile. The past 2 trading sessions had more noticeable ups and downs, but they played out in an even narrower range. Friday, specifically, was woefully range-bound with 10yr yields essentially in a 2bp range all day. Balmy PPI data and Fed Chair decisions and historic volatility in certain commodities didn't make any difference. Even the 3pm ET month-end trading barely registered a response despite the typical surge in volume (by far the highest minutes of volume of every month). Next week brings the big ticket econ data and thus a chance for some legit data driven volatility.

The screenshot shows the MBS LIVE trading platform interface. On the left, a 'TIME PENDING' table lists bond yields for various maturities, such as 30 Year, 20 Year, 10 Year, and 5 Year, with their current prices and yields. In the center, there are two 'REAL TIME CHART (BOND)' windows for '30YR FINRA 4.0' and '10 Year Treasury'. The 30YR chart shows a price of 106.75 (0.00) with a green line and red dots. The 10 Year Treasury chart shows a price of 1.8270 (-0.0010) with a green line and red dots. Below the charts is a 'LIVE NEWS STREAM' section with a large play button. On the right, there is a 'LIVE CHAT' window with a list of messages from users like 'Victor Daniels' and 'Matthew Graham'. The bottom of the screen has a 'LIVE REPORTS' section with a search bar and a 'Read More' button.

Lock / Float Considerations

- Mortgage rates have some insulation against broader bond market sell-offs due to GSE MBS purchases, but barring a big Treasury rally, the lower limit of the mortgage rate range was established in early January. One of two things is required for a meaningful push back toward lower rates: more selling to

set an entry point for bond buyers, or legitimate deterioration in big ticket data (and there's none on the horizon until the first week of February).
