## Surprisingly Big Bond Rally Relative to The Data

MBS Recap | Matthew Graham | 2:55 PM

Bonds went on a bit of a buying spree on Thursday. It was the biggest rally day since November, at least, and that's impressive given the motivations. Specifically, there was a trifecta of downbeat labor market reports (Challenger, Jobless Claims, and Job Openings). Individually, none of these are worth a third of the move we saw today, but the whole was greater than the sum of its parts. There's also a 4th report being traded today: next week's big jobs report. In other words, between yesterday's ISM employment numbers and today's reports, traders are taking a cautious lead-off ahead of the big jobs report. This raises the stakes for volatility next Wednesday morning.

## Lock / Float Considerations

- Thursday's labor market data got bonds moving in a more serious way. There is no remaining big ticket data this week, but the clear implication is for next Wednesday's jobs report to either endorse a move back into the previous range or reinforce the recent breakout. On a short-term, tactical note, if you're floating with a lender who didn't offer any noticeable improvement today, you're more insulated than normal going into tomorrow.
