## In-Range PM Weakness

MBS Recap | Matthew Graham | 4:44 PM

Viewed under a microscope, it may have seemed like today was a relatively volatile session for the bond market. Weaker opening levels in Treasuries gave way to a mid-day rally that nearly got rates back to unchanged levels. But the afternoon saw steady selling that took bonds to their weakest levels of the session. In the bigger picture, this was a non-event as it leaves trading levels well within the prevailing range. Additionally, there were no compelling justifications for the move unless we want to continue to force the narrative of higher stocks prices leading to higher bond yields (where the correlation has been anything but reliable).

01:46 PM MBS down 1 tick (.03) and 10yr up 0.6bps at 4.041

## Lock / Float Considerations

- Bonds are mostly sideways near their strongest recent levels this week. Much like 3 weeks ago (when we said bonds would need convincing from econ data in order to improve very much), we'd similarly need to see some strong econ data to push rates meaningfully higher. In other words, we're a bit more insulated than we had been, but keep in mind that bonds can respond to non-econ-related events as well, provided they're big enough.
