# Just a Bit More Selling to End The Week

**MBS Recap** Matthew Graham | 4:38 PM

Nothing much new happened in the bond market today and that's not great because the status quo has been for rising energy prices to push bond yields higher (and stocks lower). The short end of the curve actually improved, but that says more about end-of-week position squaring than any new development. All told, it was the least painful day of the week despite ending at the highest yields since Feb 4. Next week brings a Fed announcement with zero chance of a cut, but still perhaps some interesting commentary on how the Fed will sort inflation implications versus the economic impact.
