Some Resilience After AM Weakness

MBS Recap | Matthew Graham | 4:15 PM

10yr yields are set to end the week at the highest levels since last July, but those were even higher highs earlier this morning. From roughly 9am-1130am ET, bonds recovered all of the day's losses in a move that was led by adjustments to Fed rate hike expectations. Yes, we can/should call it that now because there are no longer any rate cut expectations based on futures trading. Instead, there's indecision about holding steady vs a small chance of rate hikes. War headlines remain the dominant focus and weekends continue to offer a higher concentration of risk for financial markets.
