## Over Before it Began

MBS Recap | Matthew Graham | 3:49 PM

Monday proved to be a boring trading day despite the moderately big sell-off. Yields actually didn't move much during the domestic session. In fact, they didn't move during the overnight session either. Because the day's market-moving news happened on Sunday before trading began, it was instantly priced in at the open, and the rest of the day was spent drifting sideways to slightly weaker. Bonds ultimately underperformed their prevailing correlation with oil prices. We're not reading anything into this--especially in light of the Treasury auction cycle possibly adding some concessionary weakness.

## Lock / Float Considerations

- 5/11/26 - (unchanged from Friday) Bonds remain range-bound after starting the week near the highs and failing to break below 4.34%. The next big move depends on the course of the war. There's no way to set a lock/float strategy based on war headlines in the short term. In the slightly longer term, a peace deal would likely carry more benefit for rates versus current levels.
