How about a little early morning alert? It's been a while since bonds reacted this sharply to an 8:30am report, and also since PPI upstaged CPI (even in terms of volume).

The results above speak for themselves. 10yr yields are up a quick 3bps at 4.483 but MBS are only down 2 ticks (.06). The selling is finding some support from the fact that the PPI components that correlate with PCE inflation were a bit softer than last month.
