Just before the data, Trump commented that the U.S. would be attacking Kharg Island and taking other oil infrastructure sites. PPI added pressure, mainly due to the gigantic monthly headline number. Markets don't typically care much about that number, but if it's big enough, it'll eventually pass through to CPI.

MBS are down more than an eighth from opening levels and 10yr yields are almost back up to unchanged after being down 3+ bps.
