Compared to Oil, Yields Not Quite as Willing to Drop

MBS Recap | Matthew Graham | 4:15 PM

While the moment-to-moment correlation between bond yields and oil prices remained almost perfectly intact today, yields were less willing to follow the bigger drops. In other words, if we benchmark bonds to oil price movement, they underperformed the drop in oil prices. \$139 billion in Treasury auctions and defensive positioning ahead of Wednesday's Fed announcement likely both contributed to that underperformance. Bottom line: it's encouraging to see the willingness to follow oil, but we won't be able to see more unrestrained trading until after Wednesday afternoon.

Lock / Float Considerations

- 7/27/26 - Oil prices dropped sharply and bonds mostly followed, which is as we would have hoped. But the chance of the war ending and the return of oil prices to levels we would have hoped for is still a possibility.

the shape of the curve and the nature of today's response to oil suggests bonds are also still nervous about the Fed meeting and, to a lesser extent, the Treasury auction cycle. Wednesday afternoon remains a focal point for this week's volatility. Bonds will feel more free to make their next move after that.
