Almost Like Clockwork

MBS Recap | Matthew Graham | 2:33 PM

Almost like clockwork, after several days spent mostly rallying on a headline-driven drop in oil prices, bonds reversed course as the tone of the headlines changed and oil prices bounced. That said, oil didn't bounce too much today. The rest of the drama for bonds came courtesy of a big corporate bond announcement before the open. Yields remain safely under supportive ceilings for now, but weekend-adjacent days have been prime candidates for war headline volatility. And as always, the jobs report can never be ruled out as a source of inspiration for better or worse.

Lock / Float Considerations

- 8/6/26 - Solid reminder today about the ever-present risk of war-related volatility in bonds. No reason to expect it couldn't be a factor again on Friday. The jobs report can also never be ruled out. No directional bias with the volatility warning. Decent lock opportunity for lenders that didn't reprice too

directional bias with the volatility warning. Decent lock opportunity for lenders that didn't reprice too significantly today. Risk takers still have their eye on overhead support in Treasuries.
