Solid Data-Driven Gains

MBS Recap | Matthew Graham | 5:09 PM

Thursday was a fairly straightforward session for bonds. Yields fell modestly overnight in response to slightly lower oil prices and then more forcefully after the cooler-than-expected PPI data. Mid-day fuel price volatility caused a slight pull-back, but not enough to undo a reasonably robust rally by the close. If there's a "yeah but," it's that yields remain broadly sideways near long-term highs and were unable to challenge last week's lows.

Market Movement Recap

- 08:36 AM Moderately stronger overnight and no whammies after PPI. MBS up an eighth and 10yr down 3bps at 4.666
- 12:55 PM Off best levels, but still up 10 ticks (.31) in MBS, and 10yr down 5.3bps at 4.644
- 03:55 PM flat this afternoon. MBS up 10 ticks (.31) and 10yr down 5.3bps at 4.643

Lock / Float Considerations

- 8/13/26 - Lowest rates in nearly 4 weeks = always a compelling lock opportunity for risk-averse clients. That said, decent inflation data, the passing of the Treasury auction cycle, and overhead technical support for Treasury yields presents a similarly compelling opportunity for the risk-tolerant crowd. From technical standpoint, the risk is the trend of higher lows since July 29th with today representing another bounce.

Technical/Trends in 10yr (why 10yr)

- Ceiling/Support (can be used as "lock triggers")
 - 4.80
 - 4.71
- Floor/Resistance
 - 4.42
 - 4.54
 - 4.62
