Boring Day But At Least Bonds Turned Green

MBS Recap | Matthew Graham | 4:24 PM

Tuesday offered remarkably of interest or consequence for the bond market. The most notable development was the brief visit to 4.75% in 10yr yields followed by the emergence of the quintessential "dip buyer" (i.e. "hey look... yields are high enough again that I think I'm going to buy some Treasuries"). The post-9:30am timing adds emphasis to that mentality among the retail investor community. Apart from that, there were no obvious motivations or relevant data points. Wednesday suffers a similar absence of scheduled events with the only exception being the Fed Minutes release at 2pm ET.
