

MORTGAGE RATE WATCH

Daily Coverage. Industry Leading Perspective.

A message from Nickolas Inhelder:

We Make Home Happen.™

Our goal is simple:

To help every family we serve get to "Yes."

Yes to the loan that unlocks the joy of home ownership.

Yes to the lending solution that meets every client's unique needs and wants.

That's why we dedicate our every resource to serve as your personal guide through the lending process, solving problems, building confidence. Aslan has access to every lending option leading to the purchase or refinance of a residential home loan.

This is more than work for us. It is our unique joy in this life to share our collective skill, creativity, and care to bring you and your family right to where you belong.

Let's make home happen.

Mortgage Rates End Higher Despite Promising Start

Mortgage rates rose 0.04% today to an index value of 7.57% for a top-tier 30yr fixed scenario for the average lender today. That uptick in and of itself isn't especially large, but it's a bit counterintuitive on a day where the hotly anticipated jobs report came in much weaker than expected.

The jobs report has 2 key components: Nonfarm Payrolls (NFP) and the unemployment rate. For most of the time any rate watcher can remember, NFP matters way more. The market still reacts to it (which is why bonds initially improved this morning), but unemployment has arguably taken the lead in terms of accurately capturing labor market trends.

Even then, today's unemployment rate of 4.2% (up from 4.1% last month) shouldn't have been a problem. The catch was that the unrounded numbers made the gap even smaller (4.175% vs 4.141%). Additionally, more people entered the labor force. If the labor force had held steady with last month, today's unemployment rate would have been 3.951%. None of those numbers is particularly troubling for the employment outlook, but 3.951% especially so.

That helped explain why bonds eventually gave back their early gains, along with a rebound in oil prices and easing concerns about European bond markets that had helped U.S. rates move lower yesterday.

When bond gains evaporate, mortgage lenders may be forced to raise rates during the day. This happened on multiple occasions. The average lender was actually slightly lower at first, but ultimately ended higher compared to Thursday's latest levels.
