

Bonds Turn Green After Econ Data and Treasury Auction

Market Summary: Wednesday, October 8, 2025 - 1:46AM

Bonds began the day in slightly weaker territory as yields continue to drift inside the narrow post-Fed range. The absence of big-ticket econ data is a key reason for the lack of volatility. But the lower-tier econ data can still move the needle as evidenced by this morning's NY Fed Survey of Consumer Expectations. The survey showed a slight deterioration in attitudes about the labor market. Bonds moved into stronger territory after that and went on to hit the day's best levels shortly after a well-received 3yr Treasury auction.

Early Gains Erase Overnight Weakness

10yr yields drifted up toward the 4.20% technical level overnight but buyers showed up at the 8:20am CME open. The initial recovery looks more technical in nature. The subsequent buying brought bonds into positive territory and likely had more to do with the day's only real econ data: the . The data showed an uptick in unemployment expectations as well as a softening in other labor market metrics. This isn't normally a market mover, but sensitivity is somewhat higher due to the absence of last week's jobs report.

Mortgage Rates Hold Steady in Tight Range

have been in a very narrow range for nearly 3 weeks with the last major move seen on September 17th and 18th following the Fed rate cut. Paradoxically but not surprisingly, rates actually moved higher after the Fed cut the Fed Funds Rate.

Contrary to popular belief, Fed comments and policy changes are not the biggest consideration for rates. That honor goes to big ticket economic data like the jobs report. Case in point, the rate drop in early September after the jobs report was bigger than the jump in rates following the Fed. Moreover, the post-Fed jump was driven mainly by upbeat economic data the following morning.

With the government in shutdown mode, we haven't had the same sort of heavy-hitting econ data--a fact that largely contributes to the recently narrow range. There was some non-government data today from the NY Fed that showed a weaker view of the jobs market among consumers, thus helping rates hold in line with yesterday's levels. Before that data, rates were set to open the day slightly higher.

Small Victory For Rates as Market Waits For Data

Contrary to mainstream notions regarding the Fed rate cut, mortgage rates moved sharply higher on Fed Day as well as the following day. Since then, they've been in a calm, sideways range, but managed to trickle to the lowest levels in that range by the end of this week. This is a logical outcome considering this week's bond market movement. 10yr Treasury yields (the most visible part of the bon...
