## Lowest Yields in Almost 4 Weeks Despite Ongoing Stock Market Recovery

Market Summary: Tuesday, November 25, 2025 - 6:02AM

There's no question that stock prices and bond yields have had more than the normal amount of correlation recently. While that created some risk of a bond market weakness in the event of a stock market correction, those fears are proving unfounded over the past 2 trading days. Granted, stocks haven't surged, but they did move back to the highest levels in a week on Monday. But bonds didn't follow. In fact, after a microscopically stronger start, yields continued to fall gradually throughout the session, ultimately closing at the lowest level since the late October Fed meeting.

## Bonds Inch to Best Levels in Over 3 Weeks

It's a data-free Monday on a holiday-shortened week and there aren't any high-impact headlines or massive stock swings to spark any serious bond market movement. Nonetheless, bonds have found a reason to rally ever-so-slightly this morning. Because yields were already at the low end of November's range on Friday afternoon, the result is that today's yields are the lowest we've seen since the late October Fed day. The next 2 days have quite a bit of data in addition to running a traditional risk of higher volatility due to holiday week trading conditions. In the bigger picture, we're likely still waiting for the mid-December econ data before bonds would have enough info to threaten the still-relatively-narrow 3 month trading range.

Today's Mortgage Rates

|            |       |        |            |       |        |            |
|------------|-------|--------|------------|-------|--------|------------|
| 30YR Fixed | 6.20% | -0.12% | 15YR Fixed | 5.75% | -0.05% | 11/25/2025 |
|------------|-------|--------|------------|-------|--------|------------|

Mortgage Rates Slightly Lower to Start Holiday-Shortened Week

Thanksgiving weeks can be weird for . This has to do with the fact that rates are dictated by the bond market and the bond market depends on real live people who can actually be out of the office on holiday weeks. The lighter levels of participation can increase volatility and cause random movement for no apparent reason.

We'll cross that bridge if we come to it. As far as Monday is concerned, there's no drama or weirdness to report. Bonds improved modestly throughout the day, thus allowing mortgage rates to move modestly lower.

Because rates were closer to the higher end of their recent range at the end of last week, the small drop means we're still very much inside the prevailing range. The next two days bring some backlogged economic data. Combined with the typical holiday-week caveats, volatility risk will thus be higher through Wednesday.

## Jobs Report and Stock Losses Help Rates Hold The Range

This week marked the return of delayed economic data from the government shutdown. Specifically, we received the important jobs report that was set to come out in early October. While this is September's data, and thus a bit stale, it was nonetheless responsible for the biggest volume spike in the bond market since the last Fed meeting. Such is the power of the jobs report relative to other econom...
