

MARKET SUMMARY

Complete Recap of Today's Market Activity

Limited Data, Fed Minutes, And Obvious Technicals

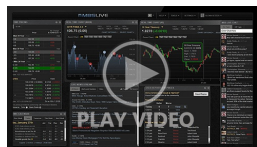

Market Summary: Wednesday, February 18, 2026 - 12:18PM

Any time the 10yr Treasury yield approaches--but fails to break--a number ending in .50 or .00, the analytical community is guaranteed to be discussing the technical significance of those levels. In the big picture, technical bounces can be anywhere remotely close to the big round numbers. As such, we are arguably once again seeing resistance at 4.00%. But does it matter? Arguably not. It's been resistance frequently since September in addition to being one of the most frequent pivot points since late 2022. Today's econ data wasn't up to the task of prompting a break. The same will likely be true of the afternoon's Fed Minutes. Absent new bullish motivations, it makes sense for yields to remain range-bound.

Market Movement Recap

08:33 AM Roughly unchanged overnight and no major reaction to 830am data. MBS unchanged and 10yr up half a bp at 4.064

Mortgage Rates Stay Flat to Start New Week

It was an uneventful day for with the average lender holding right in line with last Friday's levels. In this case, that's a good thing.

On the day before and/or after a 3-day weekend, rates tend to be more volatile than normal. That was certainly the case last Friday as the MND rate index dropped at its fastest pace since early January. By holding steady, rates remain right in line with the lowest levels in more than 3 years.

Mortgage Rates Back Near 3-Year Lows After Defying Jobs Data

The bond market drives changes in interest rates. Among bond traders, it's no secret that the Bureau of Labor Statistics' (BLS) jobs report is the most consequential monthly economic data. But this time around, the reaction defied expectations. Specifically, if you were to tell market participants the results ahead of time (i.e. 130k jobs created versus a forecast of 70k, and a 4.3% unemployemen...
