## Flat Overnight And Slow Start

Market Summary: Friday, May 29, 2026 - 10:40AM

Bonds were flat overnight for a change, with just a bit of 2-way volatility but no notable directional movement. Without any new or interesting war-related headlines, what else can we even discuss in May, 2026? There's some econ data in the form of the highest Chicago PMI reading since 2022. At 62.7 vs a 50.5 forecast, it absolutely obliterated expectations, but even that was worth less than 1bp of weakness in 10yr yields. Both MBS and Treasuries remain close enough to unchanged levels as we head into the 10am ET trading hour.

## Mortgage Rates Officially Hit 2 Week Lows

We were close yesterday and we officially arrived today. may still be elevated compared to almost all of the past 10 months, but they're the lowest they've been since May 14th.

This was accomplished with a modest drop versus yesterday's levels after another round of news on a potential U.S./Iran peace deal. This morning's inflation data also helped the underlying bond market find its footing.

In terms of nuts and bolts, top tier 30yr fixed rates fell to 6.59% for the average lender, down from 6.61% yesterday and from 6.75% last Tuesday.
