MARKET SUMMARY

Complete Recap of Today's Market Activity

Early Strength Thwarted by Data and Resilience in Equities

Market Summary: Wednesday, November 4, 2026 - 2:21AM

There are several ways to view today's bond market movement and none of them are terribly important. Sharply lower oil prices had a small, friendly impact on bonds early in the day following more hopeful war-related headlines, but context is important. A 3-4 dollar drop in oil merely got 10yr yields back in line with overnight lows. In other words, there's still precious little correlation here. Oil reversed course fairly quickly and bonds got hit harder by strong JOLTS data (job openings and labor turnover survey). Correlation with tech stocks was minimal, but it didn't help that the NASDAQ inched higher from overnight lows throughout the session.

Early Strength Thwarted by Data and Equity Resilience

MBS & Treasury Markets

UMBS 6.0	99.85	+0.10	10YR	4.943%	-0.028%	11/4/2026 12:19AM EST

Losing ground after strong Job Openings data

Job Openings (JOLTS) came out much stronger than expected and bonds are continuing to move into negative territory, following an initial pull back after additional war-related headlines.

10yr yields are now up just over 4bps and just under 4.95.

MBS are down 3 ticks (0.09), and just over an eighth from the AM highs.

Mortgage Rates Move Slightly Higher After Stronger Econ Data

Well... they can't all be winners. It seems as if rates could do no wrong over the past 3 days with each marking the lowest level in more than a month for the average top tier 30yr fixed rate. Today wasn't a winner, but it wasn't exactly bad. Apart from the past 3 days, today would still have been the lowest rate in more than a month, and it was only 0.03% higher to boot.

So what happened?

First off, when we're talking about a 0.03% change day-over-day, it's not particularly important to investigate causation because that level of movement falls in the "incidental" category. Nonetheless, there was some obvious motivation this morning in the form of stronger economic data.

Job openings data for the month of September was released today. It was the highest in 4 months and quite a bit higher than expected. All else equal, stronger labor market data tends to put upward pressure on rates. Tech stocks were also modestly higher today, and weakness in the tech sector has been a key factor driving persistently lower rates over the past several weeks.

Economic Calendar

Time	Event	Actual	Forecast	Prior
Wednesday, Nov 04
